Summary

Software Developer with a strong foundation in Python, OOPs, Data Structures Algorithms, Django, PostgreSQL, and Docker. Skilled in building backend systems, developing scalable web applications, and designing efficient database solutions. Passionate about solving real-world problems through technology and continuously improving development skills in fast-paced environments

Skills

Programming Languages: Python, SQL

Core Computer Science: Data Structures Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

Backend Development: Django, REST API Development

Databases: PostgreSQL, SQLite

Web Technologies: HTML, CSS

Tools Technologies: Docker, Git, GitHub

Other Skills: Problem Solving, Database Design, Debugging, Scalable Application Development

Projects

NeuroRead — Inclusive Digital Library & Agentic AI Reading Assistant

Live: <https://neuroreader-kqqt.onrender.com>

Tech Stack: Python, Django, Django REST

- Developed an AI-powered inclusive reading platform designed for neurodivergent learners including Dyslexia, ADHD, and visually impaired users.
- Implemented PDF parsing and intelligent reading tools such as focus mode, reading ruler, and reading progress tracking.
- Integrated HuggingFace AI models to automatically simplify complex paragraphs and generate structured summaries.
- Designed adaptive typography modes to improve readability using smart fonts, spacing, and accessibility-focused UI.

Rural Hospital Telemedicine System

Jan 2026

Tech Stack: Python, Django, PostgreSQL, HTML, CSS, JavaScript, WebRTC

- Built a rural healthcare platform enabling remote consultation between doctors and patients in underserved areas.
- Integrated real-time video consultation using WebRTC for secure doctor-patient communication.
- Developed patient record management and appointment scheduling modules using Django backend.
- Designed a lightweight UI optimized for low-bandwidth rural environments.

Awards & Certifications

- **Runner-Up — Nitte National Hackathon (2026):** Secured 2nd place and won **10,000 cash prize** for developing a **Rural Hospital Telemedicine System** with integrated real-time video consultation.
- **Python Programming Certificate – Udemy:** Completed comprehensive training covering Python fundamentals, Object-Oriented Programming, and problem-solving techniques.
- **Django Web Development – Udemy:** Learned backend web development using Django, REST APIs, authentication systems, and database integration.
- **Docker Essentials – Udemy:** Gained practical experience in containerization, Docker images, and deploying applications using Docker.
- **SQL & PostgreSQL for Developers – Udemy:** Completed hands-on training in relational databases, advanced SQL queries, and PostgreSQL database management.

Education

Bachelor of Computer Applications (BCA)

Canara College, Mangalore

Expected 2027

CGPA: 8.12
