

Q1: What is computer hardware?

Computer hardware refers to the physical components of a computer system such as CPU, monitor, keyboard, mouse, motherboard, RAM, and storage devices.

Q2: What is the function of CPU?

CPU (Central Processing Unit) is the brain of the computer. It processes instructions, performs calculations, and manages system operations.

Q3: What is RAM?

RAM (Random Access Memory) is temporary memory used by the computer to store data and programs currently in use.

Q4: What is the difference between RAM and ROM?

RAM is volatile memory used for temporary storage, while ROM is non-volatile memory that stores permanent instructions.

Q5: What is a motherboard?

The motherboard is the main circuit board that connects and allows communication between all hardware components.

Q6: What is a network?

A network is a group of interconnected computers that share resources and information.

Q7: What is LAN?

LAN (Local Area Network) is a network that connects computers within a limited area like a school, office, or home.

Q8: What is WAN?

WAN (Wide Area Network) connects computers over large geographical areas, such as the Internet.

Q9: What is an IP address?

An IP address is a unique numerical label assigned to each device connected to a network for identification and communication.

Q10: What is a router?

A router is a networking device that forwards data packets between computer networks.

Q11: What is a switch?

A switch connects devices within a LAN and uses MAC addresses to forward data to the correct destination.

Q12: What is a modem?

A modem converts digital data from a computer into signals suitable for transmission over telephone or cable lines.

Q13: What is DNS?

DNS (Domain Name System) translates domain names into IP addresses.

Q14: What is network topology?

Network topology refers to the physical or logical arrangement of network devices.

Q15: What is the OSI model?

The OSI model is a conceptual framework with 7 layers used to understand and implement network communication.
