

C PROGRAMMING NOTES

Unit 1: Introduction to C

1. History of C Language.
2. Structure of C Program.
3. Compilation and Execution process.
4. Keywords and Identifiers.

Unit 2: Data Types and Operators

1. Basic Data Types: int, float, char, double.
2. Variables and Constants.
3. Arithmetic, Relational, Logical Operators.
4. Increment and Decrement Operators.

Unit 3: Control Statements

1. if, if-else, nested if.
2. switch statement.
3. Loops: for, while, do-while.
4. break and continue statements.

Unit 4: Functions

1. Function declaration and definition.
2. Function arguments and return values.
3. Recursion.
4. Storage classes.

Unit 5: Arrays and Strings

1. One-dimensional and two-dimensional arrays.
2. String handling functions.

Unit 6: Pointers

1. Pointer basics.
2. Pointer arithmetic.
3. Pointers and arrays.
4. Dynamic memory allocation (malloc, calloc, free).

Unit 7: Structures and Unions

1. Defining structures.

2. Accessing structure members.

3. Union concept.

Unit 8: File Handling

1. File opening and closing.

2. Reading and writing files.
